Applicant: Deng et al.
Appl. No.: 10/659,464
Filing Date: September 9, 2003
Title: WAVEGUIDE FORMING METHODS AND WAVEGUIDES FABRICATED
THEREFROM
Attorney Docket No.: 134239
Pub. No.: US 2005/0053346 A1
Pub. Date: March 10, 2005

This is a decision on the request for corrected of patent application publication under 37 CFR 1.221(b), filed on May 27, 2005, for the above-identified application

The request is DISMISSED.

Applicant requests that the application be republished because the patent application publication contains a material error as the wrong application was scanned into the file wrapper.

37 CFR 1.221 (b) is applicable "only when the Office makes a material mistake which is apparent from Office records." A material mistake must affect the public's ability to appreciate the technical disclosure of the patent application publication, to determine the scope of the patent application publication, or to determine the scope of the provisional rights that an applicant may seek to enforce upon issuance of a patent.¹

The request is dismissed, as an attorney did not sign the paper in compliance with 37 CFR 1.31-1.34 and 37 CFR 10.10. Applicant is reminded that only registered practitioners may practice before the USPTO.

The applicant is advised that a "request for republication of an application previously published" may be filed under 37 CFR 1.221 (a). Such a request for republication "must include a copy of the application compliance with the Office's electronic filing system requirements and be accompanied by the publication fee set forth in § 1.18 (d) and the processing fee set forth in § 1.17 (i)." If the request for republication does not comply with the electronic filing system requirements, the republication will not take place and the publication fee set forth in § 1.18 (d) will be refunded. The processing fee will be retained.

Any request for republication under 37 CFR 1.221(a), must be submitted via the EFS system and questions or request for reconsideration of the decision, should be addressed as follows:
